Emily Townsend
Cooperative Children's Book Center

Engaging Kids of All Ages
in a Statewide Reading Club

Emily McKnight Townsend, Librarian
Cooperative Children's Book Center
School of Education
University of Wisconsin-Madison

Mission:
Provide high-quality book selections for children and teens throughout our state. Each month features one more Read On Wisconsin titles for children and teens in five different age-level groups – books at every reading level

Connecting kids and teens with terrific books, and encouraging them to think and to talk about what they are reading, or what is being read to them

Cooperative Children's Book Center (CCBC) partners with:
- Media, Educational Resources and Information Technology Division (MERIT)
- Wisconsin DPI's Division for Libraries and Technology
- TeachingBooks.net (provided by BadgerLink)

Read On Wisconsin sponsors include:
- Youth Services Section, WLA, sponsor

Read On Books

Yearly Book Lists provide
- five age level groups
- range of different reading abilities
- variety of genres and formats
- Wisconsin authors and/or illustrators
- cultural diversity and authenticity
- balance of male and female protagonists

Robin = Babies, Toddlers and Preschoolers

White-tailed Deer = Primary (Grades K-2)

Muskie = Intermediate (Grades 3-5)

Maple leaf = Middle School

Badger paw print = High School

New titles each month for five different age groups that

reflect cultural diversity and authenticity, features a balance of male and female protagonists/subjects, and includes a variety of genres and formats (fiction/non-fiction/poetry/graphic novels).

highlight one or more books by Wisconsin authors and/or illustrators, and

as a whole, create a list for each age level group that will meet the needs of children at a range of different reading abilities; range of reading levels per age level.

Literacy Advisory Committee read, discuss and choose titles for the list; write three questions for each title -- Discussion Starters that model ways to interact and engage with children and teens around literature.

You can find resources to help in programming or for promoting the books through our website and social media, but we also want to get kids around the state interacting with one another about books – may be making and sharing book trailers or podcasts; may be reviews of books on a blog; discussing a book on google communities; Sophie's squash – sharing your squash friend on Instagram and other social media.
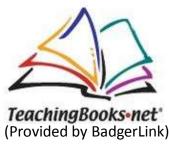

Our website: booktrailers made by students to watch or upload your own; discussion questions –

Google+ soon we'll have community for book discussions with kids around the state; blogger where kids' book reviews can be posted and commented on

Twitter: https://twitter.com/ReadOnWi: Connect and update: connection with authors, illustrators, and resources; twitter chats – opportunities for librarians and kids

Pinterest: http://www.pinterest.com/readonwisconsin/: Resources: CCBC annotations, links to contextual materials – poetry contests or poetry games for a book of poems; links to using primary sources and to primary sources from Library of Congress for non-fiction book. Board where librarians, teachers, students can post what their Read On Wisconsin activities

BadgerLink is Wisconsin's online library which provides access to licensed content such as magazines, newspapers, music, book content, images, video, journals, census records, practice tests and more. These resources are provided exclusively for use by all Wisconsin residents and are materials that are not available through regular search engines such as Google.

By purchasing information resources through a statewide contract, BadgerLink saves Wisconsin libraries and residents over $70 million each year!

In addition to saving libraries money by purchasing content, BadgerLink saves staff time by providing supplemental tools, trainings, and tech support.

BadgerLink is a fantastic resource for Wisconsin residents of all ages but is particularly useful to kids as the content is reliable, trustworthy, and age appropriate.
 From the BadgerLink Homepage you can browse by format (books, encyclopedias, magazines, multimedia, newspaper or Spanish language), subject (auto repair, business & consumer, college & jobs, computer software, government, health, history, literature, or science & technology), or user group (students, educators, or genealogist).
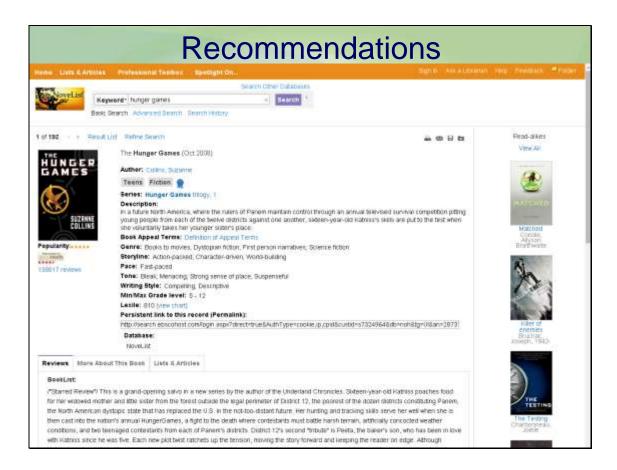

So now we'll take a look at some resources that are directly relevant to the work that you do with youth.
Book Stuff:
NoveList and NoveList K-8 provide reader's advisory tools. And TeachingBooks.net offers multimedia to bring K-12 books to life.

Discussion Guides

There are extensive discussion guides available on many titles. These can be especially helpful for book discussions hosted at the library.

Attached to every fiction title are book recommendations—if you liked this book try this book. In addition to these "read-a-likes" are author and title read-a-like articles with more extensive information about the terms of appeal for the book.

The crossover: a basketball novel
(Mar 2014)

By: Alexander, Kwame

Popularity:★★★☆☆

The true blue scouts of Sugar Man Swamp
(Jul 2013)

(Jan 2000)

By: Ellis, Deborah, 1960-

Popularity:★★★★★

Another reader's advisory topic is booklists. NoveList and NoveList K-8 both provide ready book lists. The one displayed is Read-Aloud Novels for Grades 6-8.

Multimedia Jack Gantos Meet-the-Author

This is a short stack of journals I have.

 A tool that you can use in a book club or even to get kids interested in a book, are the multimedia resources in TeachingBooks. I won't go into great detail because TeachingBooks is also represented in this training, but just know that they have videos, book lists, and discussion guides also available for K-12 fiction and nonfiction books.

Learning Games:
BadgerLink has learning games in a couple of our resources. Additionally we have also created one.

You can find links to the learning games I'm about to talk about on the For Educators Activities and Learning Games page on the BadgerLink website.

Scavenger Hunts

We have scavenger hunts. Scavenger hunts are available for many of our resources and are good activities that kids can do to become more familiar with BadgerLink.

Games

BadgerLink also has interactive learning games available in Britannica School's Learning Zone. Games are designed for pre-k to 4th graders and can help kids learn shapes, colors, spelling, math, and grammar. If you have computers in the children's area, you can easily keep Learning Zone up in a browser window and kids can pick games that they want to play.

Homework Help:
About homework help, I want to show that these are just a few of the resources that with incredibly valuable information that students can use to help with homework. Teachers are more frequently assigning research projects and BadgerLink has a variety of online resources that students can access at school, at the library, and at home.

If you ever have any questions about using a BadgerLink resource you can Ask a Librarian. I am the librarian who answers these questions. If you are having a technical problem using BadgerLink, use our Help pages and we will figure out how to best provide you access to our resources.

You can contact us from the Help pages, or here is our contact information.
